EDUCATION

PUNE UNIVERSITY

BACHELOR OF ENGINEERING IN ELECTRONICS AND TELECOMMUNICATIONS

Jun 2015 – Jun 2019 | Pune, India
Sinhgad College of Engineering
CGPA: 8.0/10.0

**RELEVANT COURSEWORK: DATA
STRUCTURES, ALGORITHMS,
MICROPROCESSORS, EMBEDDED
SYSTEMS**

SKILLS

TECHNICAL SKILLS

PROGRAMMING LANGUAGES

Java (Proficient) • Python
(Intermediate) • Go (Intermediate) •
JavaScript (Intermediate) • Bash
(Familiar)

FRAMEWORKS & LIBRARIES

Spring Boot • Angular • Spring MVC •
Hibernate

TOOLS & PLATFORMS

AWS (Kinesis, S3, Lambda, EC2, SNS,
SQS) • Kafka • Docker • Kubernetes
• Git • Azure DevOps • Linux •
Maven • IntelliJ Idea

DATABASES

MySQL • PostgreSQL • Oracle SQL •
MongoDB

LANGUAGES

FLUENT

English • Marathi • Hindi

PROFILE

- Backend Engineer with 4+ years of experience building scalable, event-driven systems using Java, Spring Boot, and Kafka.
- Experienced in designing REST APIs, asynchronous workflows, and integrating modern microservices with legacy banking systems.
- Strong in cloud-native development (AWS), containerization (Docker, Kubernetes), and workflow automation.
- Solid foundation in data structures, system design, and writing maintainable, testable code.

EXPERIENCE

INFOSYS | BNY MELLON

BACKEND ENGINEER | JAVA, SPRING BOOT, KAFKA, ANGULAR, ORACLE
Aug 2025 – Present | Pune, India

- Developed and maintained backend services for wealth management and custody platforms supporting critical banking workflows.
- Integrated micro-frontends with enterprise platform (NetX) via Spring Boot services, reducing integration overhead.
- Implemented Kafka-based event listeners for asynchronous workflows, enabling reliable high-volume event processing.
- Automated workflows using CNM jobs and Bash scripting, reducing manual effort by 30
- Integrated IBM PIL Queue with COBOL copybook mapping to enable communication with legacy systems.
- Collaborated across teams to improve system stability and streamline deployments.

MINDSTIX SOFTWARE LABS | WGACA

MEMBER OF TECHNICAL STAFF | JAVA, AZURE, SPRING BOOT, VTEX
April 2025 – July 2025 | Pune, India

- Contributed to Salesforce to VTEX migration, including system analysis and integration design.
- Built event-driven inventory sync across VTEX, Square (POS), and third-party platforms.

QUEST GLOBAL | HP

SOFTWARE ENGINEER | JAVA, AWS, SPRING BOOT, GO
March 2023 – April 2025 | Pune, India

- Designed subscription management middleware for e-commerce platforms, reducing integration time by 30%.
- Optimized AWS S3 storage, reducing data consumption by 70% and saving \$1000-\$5000 annually.
- Implemented rate limiting and improved system stability for high-traffic applications.
- Enhanced security by integrating Veracode and SonarQube, reducing vulnerabilities by 40%.
- Built a Go-based CLI tool and automated testing workflows using Docker, Bash, and Makefile, reducing testing time by 50% and deployment time by 25%, while improving test accuracy.
